Student Comments:

'Music Tech. is an enjoyable course where we can learn about microphone techniques and create professional audio tracks of live music in the recording studio. Music Tech is becoming more and more important in the production of modern music and the use of teamwork skills where we are able to work with a variety of musically talented students.' - Olivia Jones and Steph Brunzel-Roberts

'Music Technology shows all the different aspects of the music industry within one enjoyable course. It will develop your musical knowledge and find your pathway into the music industry.'
Michael Teeson

'Music Technology creates an insight into technical music experimenting with different recording techniques and gives you the opportunity to record your own music on CD which is very exciting.'
Josh Bithell
